

Annex 6. Individual Contracting Party figures for indicators in discharges from the research and development sub-sector

Belgium

Total alpha discharges from research and development sub-sector for Belgium for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Total beta (excluding tritium) discharges from research and development sub-sector for Belgium for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Tritium discharges from the research and development sub-sector for Belgium for the period 1995 to 2013.

Denmark

Total beta (excluding tritium) discharges from research and development sub-sector for Denmark for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Tritium discharges from the research and development sub-sector for Denmark for the period 1995 to 2013.

France

Total alpha discharges from research and development sub-sector for France for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Total beta (excluding tritium) discharges from research and development sub-sector for France for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Tritium discharges from the research and development sub-sector for France for the period 1995 to 2013.

Germany

Total beta (excluding tritium) discharges from research and development sub-sector for Germany for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Tritium discharges from the research and development sub-sector for Germany for the period 1995 to 2013.

Netherlands

Total alpha discharges from research and development sub-sector for the Netherlands for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Total beta (excluding tritium) discharges from research and development sub-sector for the Netherlands for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Tritium discharges from the research and development sub-sector for the Netherlands for the period 1995 to 2013.

Norway

Total alpha discharges from research and development sub-sector for Norway for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Total beta (excluding tritium) discharges from research and development sub-sector for Norway for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Tritium discharges from the research and development sub-sector for Norway for the period 1995 to 2013.

Portugal

Total beta (excluding tritium) discharges from research and development sub-sector for Portugal for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Switzerland

Total alpha discharges from research and development sub-sector for Switzerland for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Total beta (excluding tritium) discharges from research and development sub-sector for Switzerland for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Tritium discharges from the research and development sub-sector for Switzerland for the period 1995 to 2013.

United Kingdom

Total alpha discharges from research and development sub-sector for the United Kingdom for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Total beta (excluding tritium) discharges from research and development sub-sector for the United Kingdom for the period 1995 to 2013. Time periods indicated are baseline period (black columns), assessment period (white columns) and intervening years (grey columns).

Tritium discharges from the research and development sub-sector for the United Kingdom for the period 1995 to 2013.
