

Implementation of OSPAR Recommendation 2003/2

Database on Encounters with Dumped Conventional and Chemical Munitions

OSPAR Convention

The Convention for the Protection of the Marine Environment of the North-East Atlantic (the "OSPAR Convention") was opened for signature at the Ministerial Meeting of the former Oslo and Paris Commissions in Paris on 22 September 1992. The Convention entered into force on 25 March 1998. It has been ratified by Belgium, Denmark, Finland, France, Germany, Iceland, Ireland, Luxembourg, Netherlands, Norway, Portugal, Sweden, Switzerland and the United Kingdom and approved by the European Community and Spain.

Convention OSPAR

La Convention pour la protection du milieu marin de l'Atlantique du Nord-Est, dite Convention OSPAR, a été ouverte à la signature à la réunion ministérielle des anciennes Commissions d'Oslo et de Paris, à Paris le 22 septembre 1992. La Convention est entrée en vigueur le 25 mars 1998. La Convention a été ratifiée par l'Allemagne, la Belgique, le Danemark, la Finlande, la France, l'Irlande, l'Islande, le Luxembourg, la Norvège, les Pays-Bas, le Portugal, le Royaume-Uni de Grande Bretagne et d'Irlande du Nord, la Suède et la Suisse et approuvée par la Communauté européenne et l'Espagne.

Introduction

This document provides an overview of the implementation of OSPAR Recommendation 2003/2 on an OSPAR Framework for Reporting Encounters with Marine Dumped Conventional and Chemical Munitions in the OSPAR Convention area. It is based on national implementation reports received up to the end of 2008. It updates the report from the first reporting round in 2005 which was published in 2007, and evaluates the experience gained from the reporting arrangements set out in the Recommendation.

Annex 1 is a short description of the system that Contracting Parties have established to meet the aims of OSPAR Recommendation 2003/2 on an OSPAR Framework for Reporting Encounters with Marine Dumped Conventional and Chemical Munitions or failing that, an explanation why they have not established such a system. The information presented has only minor changes since last reported in 2007.

The database at Annex 2 compiles the data submitted to the OSPAR Secretariat by Belgium, France, Germany, the Netherlands, Ireland, Spain, Sweden and the United Kingdom. Denmark and Norway have reported that they have recorded no encounters with dumped chemical or conventional munitions during the period since OSPAR reporting started.

The list of Contracting Parties' contact points for reporting on encounters is at Annex 3.

Evaluation of the experiences gained

OSPAR Recommendation 2003/2 on an OSPAR Framework for Reporting Encounters with Marine Dumped Conventional and Chemical Munitions in the OSPAR Convention came into force on the 2nd July 2004. Since then over 1800 encounters with chemical and conventional munitions were reported by Contracting Parties. This has allowed the publication of the Assessment of the Impact of Dumped Conventional and Chemical Munitions under the OSPAR Joint Monitoring and Assessment Programme, and its update with a more detailed assessment in 2009 dealing with encounters reported between 1999 and 2008 (OSPAR Publication number 365/2008).

These assessments have shown that fishing in the southern North Sea and dredging to the west of Den Helder are the activities most likely to result in the encounter of munitions.

The level of reporting increased in 2005 following the tragic death of three fishermen in the southern part of the North Sea when a World War II bomb exploded on board their fishing vessel after been hauled aboard in their nets. This high level of reporting was not sustained and it is not possible to establish if this is as a result of fewer encounters or less reporting of encounters.

In terms of the reporting, Contracting Parties are required to report encounters on a three year cycle, but when clusters of munitions encounters occur these should be reported as soon as possible.

Paragraph 3.6 of the Recommendation states that it should be reviewed periodically in the light of experience gained by its implementation and that the first such review should take place not later than 2009. A number of issues arose during the reporting and assessment of munitions since the Recommendation came into force. These issues are identified below, briefly discussed and proposals made on actions that could be taken to resolve or improve reporting under Recommendation 2003/2.

Issues arising:

- a) Timing of reporting: there was some confusion resulting from the lack of clarity on reporting deadlines. This could be clarified by requiring Contracting Parties to report all munitions encountered before the 1st September deadline every three years, however, encounters could be reported at any time and will be included in the OSPAR database on encounters. The 1st September deadline therefore refers to the reporting deadline for inclusion in the assessment of previous three year period.
- b) Multiple reporting: Contracting Parties should only report encounters with munitions that occur within their own maritime jurisdictions. In the last round of reporting two or more Contracting Parties reported the same encounters on a significant number of occasions. This indicates that there is an important exchange of information between authorities on munitions encountered. This exchange should continue and be encouraged by OSPAR as there are serious health and safety issues relating to encounters by fishermen. However, multiple reporting of the same encounter distorts that data and makes interpretation difficult.
- c) False reporting: on a number of occasions encounters with materials that were not actually dumped munitions were reported. These included marine flares, fireworks, and military targets of recent origin. Proper quality control procedures should be put in place by Contracting Parties and data checked for anomalies before reporting.
- d) Accurate coordinates: for the majority of reported munitions Contracting Parties did not report the coordinates as specified in the explanatory notes of Recommendation 2003/2. It is specified that degrees and decimal degrees be used. Aside from the additional work required in converting coordinates, such conversions result in the unnecessary introduction of inaccuracies.
- e) Nature of encounter: this refers to the nature of the activity being undertaken when munitions are encountered. It is proposed to include diving and mine-hunting and categories of activities in the reporting format.
- f) Format: there is a clear need to prepare a formatted excel spread sheet and provide this to Contracting Parties for submitting results.

Annex 1: Short description of contracting parties systems for reporting on encounters with dumped conventional and chemical munitions in accordance with Article 5 of OSPAR Recommendation 2003/2

1. Belgium

1.1 Treatment of mines and explosives fished up at sea

Mines, torpedoes, depth charges and/or other explosive armaments are sometimes brought aboard trawlers or get caught in fishing nets. This is often the case when trawling in areas which are relatively far from the Belgian coast. Despite the fact that these explosives were covered by water for many years, many risks are associated with them. Below are some guidelines which need to be respected when picking up these objects.

When one notices a suspicious explosive in fishing net which is not yet on board, it should NOT be taken on board. Cutting the net is always the safest measure. If possible this should be done after the fishing net is laid out and dragged from the normal fishing grounds, always to shallower water.

If the suspicious explosive is only detected when the contents of the fishing net are already on deck, the following actions should be taken:

- The object should be protected from jolts;
- The object should be packed on deck so that is free from all heating and vibration sources;
- The object should be attached very tight in order to prevent all movements;
- The object should be covered and cut off from the open air (This is important because all explosive exposed to open air becomes very sensitive to shakes when it has dried up);
- An explosive weapon may never be sunk in water deeper than that of the place where it was found.

For the safety of maritime transport and fishing vessels, the position of the sunk explosive or of the fishing net when this was cut, must be beacons and reported to "Commando Marineoperaties, permanente van Composnav, Graaf Jansdijk 1, 8380 ZEEBRUGGE, via MRCC (Marine Rescue and Coordination Centre)- KUSTWACHT OOSTENDE at Ostend.

When a suspected explosive weapon has been fished up in a position which is less than two hours navigation from the Belgian coastline, this fact should be reported by radio to the MRCC-KUSTWACHT-OOSTENDE at Ostend. This report should also contain the estimated place and hour of arrival of the ship. When the harbour is in view, diver-mine disposal experts will come with a marine vessel and board the fishing vessel. They will give by radio their advice on the possibility to enter the harbour: for Ostend harbour it will be reported to traffic control, for Zeebrugge harbour to Port control. In this case the fishing vessel has to moor at the designated place.

If the mine disposal experts judge the risks too high and that dismantling must take place either in open sea or after stranding of the vessel, the mine disposal experts will in consultation with the MRCC-KUSTWACHT-OOSTENDE, give this order.

A vessel with an explosive weapon on board or in its fishing net will notify all vessels navigating in the neighbourhood of this. If the fishing net is being cut or if the explosive was sunk, this position will be communicated to the neighbouring maritime traffic and the MRCC-KUSTWACHT-OOSTENDE.

In no case should one try on ones own initiative to pick up a mine and enter a harbour with it.

1.2 Report of encounters with dumped conventional and chemical munitions

Belgium reported 749 encounters with munitions for the period 1999 to September 2008. Some of these encounters were also reported by the United Kingdom and Netherlands.

2. Denmark

2.1 Short description of the system

On the basis of a circular from the Danish Ministry of Justice, the Armed Forces have issued detailed regulations for the handling of containers containing dangerous or unknown chemicals in peace-time, including containers and munitions containing chemical warfare agents.

The task of the Ministry of Defence in connection with chemical munitions recently caught by fishermen is, among other things, to assess the ammunition caught and to advise as to whether to dump or bring the munitions ashore. The Naval Explosive Ordinance Disposal team carries out the assessment. Furthermore the Ministry of Defence is in charge of, or if relevant, provides guidance for the handling of chemical munitions in connection with any emergency dumping and is in charge of bringing such munitions ashore with a view to depositing it, etc.

The problem with chemical warfare agents in fishing tackle is primarily concentrated in an area east of Bornholm, in the Baltic Sea. In order to meet any problems, considerably larger areas encircling the dumping fields have been designated as risk areas. Rules have been laid down for fishing in these areas through various Orders. For example, it is obligatory for the vessels to bring along protective and chemical warfare agent first aid equipment, and fishing restrictions are in force in certain parts of the areas.

The areas marked "anchoring and fishing not recommended" cover known locations with dumped chemical warfare agents and munitions. Fishing in these areas is not prohibited, but in the case of any catch of chemical warfare agents in these areas there is no possibility of obtaining ex gratia compensation payments for lost catch and/or spoiled equipment from the State.

According to the Danish Defence Command's (Forsvarskommandoen) Directive for Chemical Warfare Readiness on Bornholm, it is the decontamination team leader who releases the vessel after the decontamination. Before fishing is reassumed, the vessel and gear have to be approved by the local Fishery Authority.

If the chemicals recovered pose a risk of explosion, they will be dumped as emergency dumpings in the areas marked "gas munitions" on the sea charts. However, for personnel safety reasons the Explosive Ordinance Disposal team will often dump it as an emergency at Maltkværnen (East of Bornholm), which is marked as a prohibited area, or Southwest of Rønne (Bornholm), which is also marked as a prohibited area.

If the Navy experts do not find that there is a risk of explosion after a close examination of the material caught, it will be brought ashore and deposited in a special depot by Naval District Bornholm, until it can be handed over to the company Kommunekemi for destruction.

2.2 Report of encounters with dumped conventional and chemical Munitions

No encounters of munitions within the OSPAR area of the Danish marine waters have occurred, and for that reason no reporting has taken place.

3. France

3.1 Short description of the system

The discovery of munitions at sea and on the coastline, is systematically reported to the services of the port prefecture responsible for two maritime sectors designated as contact points.

The amended arrêté préfectoral no 13/89 of 11 July 1989 covers the current regulation. It concerns the regulation of the disposal of suspect device found at sea and the setting up of temporary deposit sites and neutralisation of these devices around the main ports of the first maritime region.

This document, as well as the information promoting its implementation, is available on the website of the two port admirals (www.premar-atlantique.gouv.fr ; www.premar-manche.gouv.fr).

3.1.1 Organisation of port prefectures

By the terms of Decree 2004-112 of 6 February 2004 relative to the organisation of *action d'Etat en mer*, the port admiral is the depositary of the State's authority. He acts on the authority of the government and is a direct representative of the Prime Minister and of each minister. He has general responsibility of all sectors where *action d'Etat en mer* is at work, including defence of sovereign rights and the interests of the nation, upholding the law, safeguarding people and goods and protecting the environment.

Today, each maritime sector has its own port prefecture, Brest (for the Atlantic) and Cherbourg (for the Channel and the North Sea).

3.1.2 Setting up procedures

Every captain or ship owner has an obligation to inform the authorities of any suspect device without delay. This should be done under the following conditions:

Basic precautions:

- Never enter the port;
- Keep away from other ships and the shore;
- Always regard a device as dangerous;
- Handle as little as possible whilst avoiding any shocks.

Without delay, notify any findings of a suspicious device to the Centre Régional opérationnel de surveillance et de sauvetage by semaphore or to the nearest port captain, stating:

- the name and the number of the ship;
- its position in geographical coordinates;
- the nature and description of the device.

Procedures to follow

- Note the geographical coordinates of the immersion point of the device;

- If the device is situated in waters less than 15 metres deep, lay down the buoy;
- If placement into water is considered dangerous, the ship has to wait for the intervention team.

Within the maritime prefectures responsible for all questions relating to the implementation of the maritime policy, the sector "Action d'Etat en mer" is responsible for putting together an analytical survey of the information. An annual report is established. It contains the assessment of all deposit sites notified in France and the areas of temporary deposit sites where the munitions encountered have to be deposited.

3.2 Report of encounters with dumped conventional and chemical munitions

France reported 91 encounters with munitions during 2004.

4. Germany

Germany reported a total of 66 encounters with conventional munitions.

4.1 Short description of the system

German Federal State Schleswig-Holstein

The reporting system for encounters with munitions in the German Federal State Schleswig-Holstein is governed by the Schleswig-Holstein Ordinance on the Prevention of Risks to Public Safety Arising from Munitions (Munitions Ordinance - Kampfmittelverordnung). Encounters with munitions shall be reported immediately via the local authorities to the competent authority in charge of munitions disposal (Kampfmittelräumdienst)

Furthermore, the Seeberufsgenossenschaft – Ship Safety Division, Hamburg published two instructions relating to munitions:

- *"Merkblatt über Munitionsfunde auf See" (Instructions Concerning of Munitions Finds at Sea) of 26 June 1992*

This Instruction deals only with conventional munitions.

It contains under section "General" an introductory note about the shape of explosive devices which are shown as illustrations.

The next section deals with the handling of some munitions encounters:

- a. due to its dangerousness, munitions dumped after the Second World War shall not be taken onboard. In case such munitions are unintentionally taken aboard, they shall be thrown overboard again;
- b. when approaching German ports, munitions caught in fishing gear should be placed at the designated sites after notification of the competent Waterways and Shipping Authority or Waterways Police or Port Authority, in compliance with their instructions.

The 3rd section deals with reporting. Munitions finds shall be reported to the competent authorities in charge of munitions disposal in the German Federal States or to the Navy (in case of munitions used for training purposes). It is noted that these authorities will give further advice on handling of munitions as well as on handing over the munitions when reaching ports.

- *"Merkblatt über das Verhalten bei Kampfstoffvergiftungen auf Fischereifahrzeugen" (Instructions Concerning Actions to be Taken in Case of Poisoning with Warfare Agents on Fishing Vessels) of 30 September 1994.*

This Instruction deals predominantly with chemical munitions, in particular those in the Baltic Sea. It lists the general areas in which finds of warfare agents can be expected and gives a general overview about the kind of warfare agents in these areas. In addition general advice for fishermen is given (for example warning of potential danger of bombs and grenades which may still contain detonators. Furthermore it gives details about measures in case the chemical munitions are caught and informs about characteristics of chemical warfare agents and First Aid measures (appearance and physical properties; detection; symptoms of poisoning and associated first aid measures).

German Federal State of Lower Saxony (Niedersachsen)

In general, findings of munitions shall be reported to the authorities responsible for averting danger. In accordance with Lower Saxony's Act on Public Safety and Order (Gesetz über die öffentliche Sicherheit und Ordnung) these are the administrations responsible for public order or the police. These authorities pass the information on to munitions disposal service (KBD; Kampfmittelbeseitigungsdienst) as the authority in charge.

Coastal fishermen – as the people often enough directly concerned due to their fishing up of munitions as "bycatch" – are requested to report to KBD directly in order to ensure a prompt safeguarding, delivery and subsequent disposal of munitions.

The two instructions of the Seeberufsgenossenschaft – Ship Safety Division, Hamburg as described for the Federal State Schleswig-Holstein apply in the same way for Lower Saxony.

4.2 Report of encounters with dumped conventional and chemical munitions

German Federal State Schleswig-Holstein

In the North Sea coastal area of Schleswig-Holstein up to now no encounters with dumped chemical or conventional munitions have occurred. As there were no encounters, Germany did not fill in the reporting format for reports of encounters (Appendix 1 to OSPAR Recommendation 2003/2).

German Federal State of Lower Saxony (Niedersachsen)

It has currently not been possible for Germany to fill in the agreed "Reporting Format for Reports of Encounters with Conventional and Chemical Munitions" in Appendix 1 to OSPAR Recommendation 2003/2. Instead the reporting below is done in a more general way (for example. time periods and type of munitions). The responsible authority in Lower Saxony will adapt the reporting system to the OSPAR requirements from 2006 onwards. Therefore, the next report which has to be submitted by 1 September 2008 will include the filled in reporting format.

German as well as allied conventional munitions originating from the Second World War were dumped in the coastal waters of Lower Saxony under the control of the British and American occupying forces. Five disused disposal sites are located in the coastal waters of Lower Saxony which are marked in nautical charts by "foul, munitions". A considerable amount of munitions are expected outside these past dumping sites. Munitions that were dumped outside the designated dumping sites are widely dispersed and frequently caught by fishermen using ground trawls.

4.2.1 State of device

German Federal State of Lower Saxony (Niedersachsen)

Previous surveys carried out on behalf of the Ministry for Environment of Lower Saxony showed that dumped munitions are partly uncovered and partly silted. Due to tidal currents these conditions are constantly changing. Therefore the speed of corrosion is constantly changing as well. Silted munitions are corroding very slowly or not at all because of the lack of oxygen. In addition, munitions were made of different materials, *i.e.* iron, aluminium and brass, and therefore show different corrosion reactions.

According to KBD (Kampfmittelbeseitigung – explosive ordnance disposal), the salvaged munitions are heavily corroded.

Quantities

- Trawled by fishermen

In former times, fishermen dumped munitions bycatch. This resulted in a widespread distribution of the munitions and in an increased re-catching in fishing gears. In order to break the circle of catching and dumping, a disposal contract was concluded between the responsible authorities in Lower Saxony and 10 coastal fishermen. Under this contract, the fishing vessels have been equipped with special containers for salvaged munitions.

In the period 2003 – 2005 altogether 2687 kg munitions were salvaged by fishermen and were subsequently disposed of by the KBD. The munitions consisted of 324 pieces of grenades, igniters, mines and ammunition parts – calibres 2.0 to 28.0 cm (2347 kg). In addition one high explosive bomb SC 250 (250 kg) was salvaged.

- Permanent munitions clearance sites in the area of the coast/the islands

Three such permanent areas are established:

1. Wangerooge – Groyne “F to T”

Co-ordinates

WGS 84	
53° 47.400' N	7° 50.910' E
53° 47.700' N	7° 54.280' E

Due to the prevailing tidal currents in the area of the island of Wangerooge, munitions are transported into the groyne heads and some beach sections. For the safety of beach visitors, in the season from March to October, the disposal of the munitions stranded on the beach is co-ordinated between the KBD and the responsible Water and Navigation Administration. In addition, there is an annual nourishment of the main beaches. The sand extracted for beach nourishment has to be checked for munitions before it can be used.

In the period 2003 – 2005 these two measures taken, resulted in the salvage of 231 pieces of grenades, igniters and ammunition parts (calibre 2.0 to 8.8 cm) with a total weight of 522.6 kg.

2. Salenburger Watt, City of Cuxhaven

Co-ordinates

WGS 84	
53° 51.910' N	8° 31.010' E
53° 51.920' N	8° 32.970' E
53° 50.500' N	8° 31.020' E
53° 50.510' N	8° 32.980' E

The Wadden Sea area of Sahlenburg used to be a test firing range in former times. For Wadden Sea hiker tourists this is a risky area. Due to the tides, the munitions may become exposed. A permanent clearance during the tourist season is co-ordinated between KBD and the Water and Shipping Office (Wasser- und Schifffahrtsamt).

353 pieces of grenades and ammunition parts (calibre of 2.0 to 31 cm) with a total weight of 2213 kg were salvaged in the period 2003 – 2005.

3. Watt Schillig, municipality of Schillig

Co-ordinates

WGS 84	
53° 42.100' N	8° 01.870' E
53° 42.250' N	8° 02.430' E
53° 41.870' N	8° 02.440' E
53° 41.770' N	8° 01.680' E

The Wadden Sea area of Schillig is located in the estuary of the Weser. Due to the prevailing currents, munitions are sporadically transported into this area. The Wadden sea area is widely used by tourists during the summer months. A danger area has been declared and is cleaned during the tourist season.

65 pieces grenades and ammunition parts, calibre of 2.0 to 5.0 cm with a total weight of 55.8 kg were salvaged in the period 2003 – 2005.

The three above-mentioned clearance sites were classified in 2005 as danger areas. All sites are very dangerous for tourists. The different types of munitions and their state of corrosion represent a permanent danger for people and the environment. A continuous salvage of munitions as well as the termination of the re-dumping of munitions by fishermen have resulted in more safety in the coastal area of Lower Saxony.

4.2.2 Chemical munitions

German Federal State of Lower Saxony (Niedersachsen)

Within the last five decades, chemical munitions were not found in the coastal waters of Lower Saxony with the exception of one finding in the Outer Ems Estuary. This single finding was an infantry grenade 18 (calibre of 7.5 cm). The warfare agent was Chloroacethopenone. Presumably it derived from dredging activities carried out in the port Emden which in the past was used as a central loading port for chemical munitions. There is no evidence of further occurrences of chemical munitions within the coastal area of Lower Saxony.

5. Ireland

5.1 Short description of the system

Marine Notice No.16 of 2001¹ issued to all fishers and other users of the sea relates to explosives and other explosive missiles sighted, picked up in trawls at sea or removed from wrecks. This notice covers chemical and conventional munitions and requires all encounters with such munitions to be reported to the Irish Navy and the Irish Coast Guard.

¹ Department of Communication, Marine and Natural Resources Website.
<http://www.dcmnr.gov.ie/NR/rdonlyres/372A4634-8DF9-4419-92FD-D56B1742890C/0/162001.doc>

The Notice provides guidance to fishers on what to do if munitions are picked up in trawls or landed on the deck and generally if sighted drifting.

Under Irish law it is illegal to remove items from wrecks while diving. Explosives or ordnance encountered during wreck diving should not be disturbed and should be reported to the local Gardai.

In all cases the location of munitions should be recorded and reported to the authorities.

Records of all reported encounters are maintained by the Irish Coast Guard, Leeson Lane, Dublin 2.

The OSPAR Contact Point for this issue is Eugene Nixon, Marine Institute, Ireland.

5.2 Report of encounters with dumped conventional and chemical munitions

This is the first report from Ireland on encounters with dumped munitions and covers the period 1 January 2004 to 31 December 2004. Subsequent reports will cover the full three year period as required in the recommendation.

This report deals with both conventional and chemical munitions picked up and sighted.

During 2004 there were 22 reports of suspicious objects sighted or discovered either on the sea or on the shore, however, on investigation, none of these were found to be munitions.

Ireland reported 1 encounter with munitions which occurred in 2007.

6. The Netherlands

6.1 Short description of the system

In the Netherlands the so-called "Bijstands- en bijdrageregeling opgeveste explosieven" (Netherlands Reporting and Handling System Explosives found at Sea) exists since the early 90's. This management system was developed for the reduction and elimination of the risks associated with encounters at sea or on the coastline with dumped conventional and chemical munitions.

The central collection point for encounters with dumped conventional and chemical munitions in the Netherlands is the Dutch Coastguard. To support and encourage fishermen and other users of the sea and its coastline, the Dutch coastguard has developed a general instruction and information sheet with essential information on:

- Aim of the management and reporting system;
- Description of munitions;
- Areas of higher risks (location of dump sites);
- A map with different types of explosives;
- Indication of the financial stimulation in case of the immediate report on the encounter with information on location, nature of the encounter, and possible type of device;
- First advice on what to do in case of an encounter and general advice on the handling of munitions;
- Contact details of the Dutch coastguard.

Encounters with munitions shall be reported immediately to the competent authority in charge of munitions disposal (Dutch Coastguard).

6.2 Report of encounters with dumped conventional and chemical munitions

The Netherlands reported a total of 592 encounters with munitions over the period 2004 – 2006, some of which were reported also by Belgium and the United Kingdom.

7. Norway

7.1 Short description of the system

In Norway it is the Norwegian Coastal Directorate that has the main responsibilities with regard to dumped chemical munitions. After the Second World War large quantities of stockpiled German weapons were dumped at sea by the allies. The Norwegian Pollution Control Authority, in collaboration with the Defence Research Institute, made a survey in 2002 at a dumping site in the Skagerrak area. The conclusion was that the wrecks were stable and there were no indications of chemicals in the water samples in the area. The main conclusions from the survey were that the best thing to do is to let the Chemical munitions stay at the dumpsites. The location of this dumpsite is 58° 17.5 N 009° 24.5 E / 58° 20.0 N 009° 40.0 E / 58° 15.0 N 009° 44.5 E / 58° 17.5 N 009° 27.0 E

In Norway there is consensus that some kind of environmental monitoring of dumpsites should take place and that research into the behaviour of persistent chemical warfare agents in the marine environment needs to be carried out. Little research has been carried out so far, except for the previously mentioned survey in 2002.

The dumpsites are marked on sea charts, but wrecks have been located also outside the marked area and occasionally fishermen get mustard gas containers in their nets. Such incidents shall be reported to the Norwegian Coastal Administration through the Coastal Radio Stations and the MRCC. The Norwegian Coastal Administration has an information folder currently in press on mustard gas at sea, in order to inform fishermen on how to react when mustard gas cans are caught in the nets.

7.2 Report of encounters with dumped conventional and chemical munitions

Norway reported no encounters with munitions.

8. Spain

8.1 Short description of the system

The system has historically worked properly. Any encounter at sea and its coastline is reported to the local Spanish Navy authorities, who are in contact with local civil maritime authorities, police departments and fisherman organizations.

Any encounter is immediately reported to the unique naval command in charge of these matters: Mando de Acción Marítima (ALMART) that can be translated as the "Maritime Action Command". This Command tasks the most appropriate EOD (Explosive Ordnance Disposal) team, taking into account the geographical position and nature of the encounter. All data and reports are sent to ALMART. These data are computerized to build a single computer data base, being the source for the Spanish contribution to the OSPAR database on Encounters.

8.2 Report of encounters with dumped conventional and chemical munitions

Spain reported 29 encounters over the period 2004 – 2008.

9. Sweden

9.1 Short description of the system

The Swedish Coast Guard has the overall responsibility for measures connected with all kind of chemical pollution, including dumped conventional and chemical munitions at sea. The Coast Guard also has a register of reported encounters. There is a common guideline that encounters should be reported to the Coast Guard. However, there is no obligation to do so, for example a fisherman that has munitions caught in his nets receives no payment for bringing it to land. According to the Coast Guard a number of encounters are not reported to the authority.

9.2 Report of encounters with dumped conventional and chemical munitions

Sweden reported one encounter which occurred in 2005.

10. United Kingdom

10.1 Short description of the system

The UK has historically had in place a system by which vessels at sea and persons on shore can report encounters with munitions at sea or on the shoreline. The UK Maritime and Coastguard Agency (MCA) Emergency Response organisation, Her Majesty's Coastguard, through its Maritime Rescue Coordination Centres (MRCC) are the recipients of all reports of munitions encountered at sea or on the shoreline.

UK MRCCs assess and then report encounters to the Ministry of Defence Joint Services Explosive Ordnance Disposal Operations Centre (JSEOD OC) which tasks an appropriate ordnance disposal team to deal with the encountered device(s) – if that is the most suitable response.

The UK has published instructions to mariners for reporting encounters with explosive devices, which are contained in MARINE GUIDANCE NOTE (MGN) 102 (M+F). All reports are to be made as soon as possible to the nearest Coastguard MRCC. Police forces and harbour and port authorities are also aware that reports of encounters with munitions at sea, on the shoreline or in ports or harbours, should be forwarded to the nearest Coastguard MRCC.

HM Coastguard records munitions encounters in its command and control computer system as an 'incident' and then reports separately, in accordance with the OSPAR directive, to the MCA SAR HQ who compile a national OSPAR database for onward reporting to the OSPAR Commission.

10.2 Report of encounters with dumped conventional and chemical munitions

Between 2004 and 2008, the United Kingdom reported 703 munitions some of which were reported by Belgium and the Netherlands also.

ANNEX 2: Database and map on encounters with munitions

DATABASE ON MUNITIONS ENCOUNTERS

482	ES-04-05	43.61°N; 008.19°W	43.61	-8.19	Found on shore	02/05/05	Conventional	Disposed of on land	Partly corroded		Identified as mortar 81 mm
483	ES-04-06	43,58°N; 005,70°W	43.58	-8.70	Diving	28/07/05	Conventional	Disposed of on land	Seriously corroded		Identified as projectile 305 mm. Found by a sport scuba diver.
484	ES-04-07	36,37°N; 006,25°W	36.37	-6.25	Diving	08/08/05	Conventional	Disposed of on land	Partly corroded		Identified as projectile 203 mm. Found by sport scuba diver.
485	UK-04-01	50 36.3 N,002 26.7 W	50.61	-2.45	Found on shore	02/04/04	Conventional	Disposed of on land	Partly corroded		distress flare recovered on rocks near beach by children. Passed to local Coast Rescue Team for disposal.
486	UK-04-02	50 27.3 N,003 32.6 W	50.46	-3.54	Found on shore	05/04/04	Conventional	Disposed of on land	Partly corroded		remains of submarine marker flare, removed for collection by EODU
487	UK-04-03	50 37.1 N,002 11.1 W	50.62	-2.19	Found on shore	07/04/04	Conventional	Disposed of on land	Partly corroded		solid shot (harmless) recovered by EODU.
488	UK-04-04	Bryher	50.67	1.55	Found on shore	11/04/04	Conventional	Disposed of on land	Partly corroded		live smoke flare recovered by CRT for later disposal
489	UK-04-05	50 33.4 N,002 26.9 W	50.56	-2.45	Found on shore	13/04/04	Conventional	Destroyed	Partly corroded		phosphorous flare detonated by EODU
490	UK-04-06	51 44.4 N,000 58.7 E	51.74	0.98	Entanglement in nets	15/04/04	Conventional	Destroyed	Seriously corroded		large parachute mine trawled by fishing vessel. The mine was placed on the seabed and safely detonated by EODU.
491	UK-04-07	51 25.3 N,001 27.8 E	51.42	1.46	Dredging activities	16/04/04	Conventional	Destroyed	Heavily corroded		dredger recovered three shells of varying sizes, ordnance collected by EODU and destroyed.
492	UK-04-08	51 10.8 N,003 18.4 W	51.18	-3.31	Found on shore	18/04/04	Conventional	Destroyed	Partly corroded		item of ordnance (type not stated) detonated by EODU.
493	UK-04-09	Coverack	50.00	-5.08	Found on shore	24/04/04	Conventional	Disposed of on land	Partly corroded		spent phosphorous flare removed for EODU disposal.
494	UK-04-10	5043.7N,108.6W	50.73	-1.14	Found on shore	26/04/04	Conventional	Destroyed	Partly corroded		Mortar rounds, probably phosphorous rounds detonated by EODU
495	UK-04-11	Studland Bay	50.66	-1.90	Found on shore	28/04/04	Conventional	Destroyed	Good condition		live mortar bomb detonated by EODU
496	UK-04-12	5037.3N,211.4W	50.62	-2.19	Found on shore	02/05/04	Conventional	Destroyed	Partly corroded		76mm naval round destroyed by EODU.
497	UK-04-13	Birling Gap	50.75	0.18	Found on shore	03/05/04	Conventional	Destroyed	Partly corroded		2 shells destroyed by EODU
498	UK-04-14	52.09.4N 001.33.6E	52.16	1.56	Entanglement in nets	14/05/04	Conventional	Destroyed	Seriously corroded		unexploded mine trawled by fishing vessel. Device placed on seabed and safely detonated by EODU
499	UK-04-15	5048.2N,24.5W	50.80	-0.41	Found on shore	16/05/04	Conventional	Destroyed	Partly corroded		unused phosphorous flare detonated by EODU
500	UK-04-16	5016.2N,446.8W	50.27	-4.78	Found on shore	18/05/04	Conventional	Destroyed	Partly corroded		unexploded naval shell collected by EODU and destroyed
501	UK-04-17	5137.3N,412.2W	51.62	-4.20	Found on shore	22/05/04	Conventional	Destroyed	Seriously corroded		Ccoastal disturbance uncovered several unexploded shells, detonated by EODU
502	UK-04-18	5122.6N,110.8E	51.38	1.18	Found on shore	23/05/04	Conventional	Destroyed	Partly corroded		2 items of unexploded ordnance removed and detonated by EODU
503	UK-04-19	5128.8N,47.1E	51.48	0.79	Other	25/05/04	Conventional	Disposed of on land	Completely corroded		suspected ordnance recovered by Medway Ports vessel close to wreck of RICHARD MONTGOMERY examined bu EODU found to be harmless remnants from Napoleonic era.
504	UK-04-20	Studland Beach	50.65	-1.95	Found on shore	27/05/04	Conventional	Destroyed	Partly corroded		unexploded bomb, safely detonated by EODU
505	UK-04-21	5209.3N,134.6E	52.16	1.58	Entanglement in nets	28/05/04	Conventional	Destroyed	Seriously corroded		fishing Vessel trawled suspected mine, left on seabed and safely detonated by EODU
506	UK-04-22	Pentewan Sands	50.28	-4.78	Found on shore	28/05/04	Conventional	Destroyed	Partly corroded		US Navy phosphorous flare destroyed by EODU
507	UK-04-23	56 08.9N, 002 25.8w	56.15	-2.43	Minehunting	09/06/04	Conventional	Destroyed	Partly corroded		practice mine located and destroyed by Royal Navy minesweeper in 59m of water
508	UK-04-24	5034.8N,228.8W	50.58	-2.48	Found on shore	13/06/04	Conventional	Destroyed	Seriously corroded		WWII unexploded shell removed and safely detonated by EODU
509	UK-04-25	5233.5N,404.7W	52.56	-4.08	Found on shore	13/06/04	Conventional	Destroyed	Partly corroded		suspect metal container destroyed by EODU
510	UK-04-26	Needles, Isle of Wight	50.59	-1.32	Found on shore	19/06/04	Conventional	Disposed of on land	Heavily corroded		35mm shell, sufficiently decomposed to allow safe removal by EODU
511	UK-04-27	5430.1N,40.1W	54.50	-0.67	Found on shore	21/06/04	Conventional	Disposed of on land	Heavily corroded		possible dummy flare safe for onland disposal by EODU
512	UK-04-28	55 54.5N 002 05.7W	55.91	-2.10	Entanglement in nets	28/06/04	Conventional	Destroyed	Seriously corroded		Ordnance believed to be a mine trawled by fishing vessel. Object returned to seabed at55 53.15N 002 06.71W prior to detonation by EODU
513	UK-04-29	51 49.81N 001 18.69E	51.83	1.31	Entanglement in nets	28/06/04	Conventional	Released at sea	Seriously corroded	44.598N 001 59.521E	EODU unable to locate at release co-ordinates, not considered a danger to shipping unless disturbed again.
514	UK-04-30	5258.6N,32.6E	52.98	0.54	Found on shore	01/07/04	Conventional	Destroyed	Partly corroded		10 unexploded ordnance rounds, including 3 high explosive, found by Coastguard Rescue Team and detonated by EODU
515	UK-04-31	5603.8N,243.2W	56.06	-2.72	Found on shore	02/07/04	Conventional	Destroyed	Partly corroded		unspecified ordnance destroyed by EODU
516	UK-04-32	5048.8N,20.9W	50.81	-0.35	Found on shore	02/07/04	Conventional	Destroyed	Heavily corroded		WWII bomb removed and destroyed by EODU
517	UK-04-33	5136.5N,418.3W	51.61	-4.31	Found on shore	03/07/04	Conventional	Disposed of on land	Heavily corroded		burnt out remains of smoke marker, safe for removal

DATABASE ON MUNITIONS ENCOUNTERS

Ref	ID	Location	Lat	Long	Nature	Date	Type	Action	State	Release	Remarks
518	UK-04-34	51 27.130N 000 47.582E	51.45	0.79	Entanglement in nets	04/07/04	Conventional	Destroyed	Heavily corroded		shell safely detonated by EODU. Believed to date from 1876.
521	UK-04-37	5252.6N,126.5E	52.88	1.44	Found on shore	11/07/04	Conventional	Destroyed	Partly corroded		phosphorous flare blown up by EODU
522	UK-04-38	5132.3N,39.3E	51.54	0.66	Found on shore	11/07/04	Conventional	Destroyed	Partly corroded		10" shell removed and detonated safely by EODU
523	UK-04-39	51 28.0 N 001 19.0 E	51.47	1.32	Entanglement in nets	13/07/04	Conventional	Destroyed	Seriously corroded		live WWII prachute mine trawled by fishing vessel in Thames Estuary. Device placed on seabed off Whitstable and safely detonated by EODU
524	UK-04-40	5558.2N,257.9W	55.97	-2.97	Entanglement in nets	14/07/04	Conventional	Disposed of on land	Completely corroded		shell casing trawled up by fishing vessel. EODU inspected the item and advised that it was no longer hazardous.
525	UK-04-41	5255.6N,119.2E	52.93	1.32	Found on shore	17/07/04	Conventional	Disposed of on land	Partly corroded		phosphorous flare removed by EODU

529	UK-04-45	5120.7N,57.6E	51.35	0.96	Found on shore	24/07/04	Conventional	Disposed of on land	Seriously corroded		unspecified WWII ordnance removed from beach by EODU
530	UK-04-46	4946.2N,733.6W	50.11	-5.50	Found on shore	24/07/04	Conventional	Disposed of on land	Completely corroded		possible ordnance found to be tail fins of old bomb removed by EODU.
531	UK-04-47	Titchwell beach, Norfolk	52.97	0.61	Found on shore	24/07/04	Conventional	Destroyed	Seriously corroded		4 corroded live shells found on beach and safely detonated by EODU
532	UK-04-48	5743.2N,322.8W	57.72	-3.38	Found on shore	25/07/04	Conventional	Disposed of on land	Partly corroded		spent smoke flare removed by CRT
533	UK-04-49	5258.4N,51E	52.97	0.85	Found on shore	26/07/04	Conventional	Destroyed	Partly corroded		suspected land mine detonated by EODU
534	UK-04-50	5120.7N,57.7E	51.35	0.96	Found on shore	31/07/04	Conventional	Destroyed	Seriously corroded		live WWII mortar shell safely detonated by EODU
535	UK-04-51	5120.7N,57.7E	51.35	0.96	Found on shore	31/07/04	Conventional	Destroyed	Heavily corroded		live WWII shell safely detonated by EODU
536	UK-04-52	5146.4N,54.3E	51.77	0.91	Found on shore	01/08/04	Conventional	Destroyed	Seriously corroded		WWII shell. 9" x 3", detonated by EODU
537	UK-04-53	5048.6N,118.4W	50.81	-1.31	Found on shore	01/08/04	Conventional	Destroyed	Partly corroded		4" shell destroyed in controlled explosion by EODU
538	UK-04-54	5254.5N,28.4E	52.91	0.47	Found on shore	02/08/04	Conventional	Disposed of on land	Partly corroded		solid shot (harmless) recovered by EODU
539	UK-04-55	50 16.12N 004 24.67W	50.27	-4.41	Other	03/08/04	Conventional	Destroyed	Partly corroded		box of flares found floating by fishing vessel. Location passed to Royal Navy vessel in the area, items destroyed by gunfire.
540	UK-04-56	56 07.23N 002 49.50	56.12		Entanglement in nets	04/08/04	Conventional	Destroyed	Seriously corroded		fishing vessel trawled remains of torpedo, left in marked position on seabed and safely detonated by EODU
541	UK-04-57	Hartlepool beach			Found on shore	04/08/04	Conventional	Destroyed	Partly corroded		live WWII mine safely detonated by EODU
542	UK-04-58	5047.8N,56.3W	50.80	-0.94	Found on shore	07/08/04	Conventional	Destroyed	Seriously corroded		unexploded bomb removed and destroyed by EODU
543	UK-04-59	Mablethorpe beach	53.34	0.25	Found on shore	08/08/04	Conventional	Destroyed	Partly corroded		phosphorous flare destroyed by EODU
544	UK-04-60	5319.9N,16.6E	53.33	0.28	Found on shore	08/08/04	Conventional	Destroyed	Partly corroded		phosphorous flare found by child, child had minor phosphorous burns to hand. Flare destroyed by EODU
545	UK-04-61	50 211N 004 27.0N	50.35		Found on shore	08/08/04	Conventional	Disposed of on land	Partly corroded		phosphorous flare recovered by EODU
546	UK-04-62	5037.2N 000 46.2W	50.62	-0.77	Dredging activities	09/08/04	Conventional	Disposed of on land	Heavily corroded		solid shot recovered by dredger. EODU confirmed as harmless
547	UK-04-63	Sampson, Isles of Scilly	49.94	-6.33	Found on shore	10/08/04	Conventional	Destroyed	Partly corroded		phosphorous flare destroyed by EODU
548	UK-04-64	60 09.8n 001 47.2 w.	60.16	-1.79	Other	10/08/04	Conventional	Disposed of on land	Partly corroded		abandoned smoke float recovered by fishing vessel
549	UK-04-65	Off Plymouth (exact position not given)	50.32	-4.15	Other	11/08/04	Conventional	Destroyed	Partly corroded		2 items of unspecified ordnance passed to EODU vessel by WS Argyle off Plymouth breakwater. Items destroyed 1nm off Plymouth
550	UK-04-66	Hayling Island beach			Found on shore	11/08/04	Conventional	Disposed of on land	Partly corroded		item was identified as (harmless) remnants of 1919 test torpedo by EODU
551	UK-04-67	5120.8N,58.2E	51.35	0.97	Found on shore	11/08/04	Conventional	Destroyed	Seriously corroded		2 live mortar bombs detonated by EODU
552	UK-04-68	Loch Ewe	57.80	-5.64	Found on shore	13/08/04	Conventional	Destroyed	Partly corroded		item identified as an unexploded marine sound signal mark 8, removed by EODU and detonated safely by controlled explosion
553	UK-04-69	5322.1N,14.9E	53.37	0.25	Found on shore	15/08/04	Conventional	Destroyed	Seriously corroded		unexploded bomb detonated by EODU
554	UK-04-70	Tregonhawke beach, Plymouth	50.34	-4.24	Found on shore	15/08/04	Conventional	Disposed of on land	Partly corroded		large smoke float recovered by EODU
555	UK-04-71	Hays Dock, Shetland			Diving	16/08/04	Conventional	Destroyed	Heavily corroded		large quantity of live ordnance discovered during dive on wreck of WWII motor torpedo boat. Recovered and destroyed by EODU
556	UK-04-72	5127.9N,19E	51.47	0.32	Found on shore	17/08/04	Conventional	Destroyed	Seriously corroded		3 unexploded bombs detonated by EODU
557	UK-04-73	Castle Island, Eigg			Found on shore	18/08/04	Conventional	Disposed of on land	Partly corroded		phosphorous flare removed by EODU
558	UK-04-74	5021.3N,509.3W	50.36	-5.16	Found on shore	18/08/04	Conventional	Destroyed	Partly corroded		maroon found on beach, believed live but found to be spent. Destroyed by EODU
559	UK-04-75	Brightstone, Isle of Wight	50.75	0.18	Found on shore	20/08/04	Conventional	Destroyed	Seriously corroded		unexploded shell destroyed by EODU
560	UK-04-76	5121N,100.2E	51.35	1.00	Found on shore	21/08/04	Conventional	Destroyed	Seriously corroded		live mortar bomb detonated by EODU
561	UK-04-77	Mundesley, Norfolk	52.87	1.43	Found on shore	23/08/04	Conventional	Destroyed	Partly corroded		phosphorous flare destroyed by EODU
562	UK-04-78	5741.5N,200W	57.69	-2.00	Other	24/08/04	Conventional	Destroyed	Partly corroded		bomb found by Grampian Police divers at Bruce's Jetty in Fraserburgh harbour. Recovered and destroyed by EODU.

654	UK-04-170	5257.8N,31.1E	52.96	0.52	Found on shore	09/03/05	Conventional	Destroyed	Partly corroded		phosphorus flare destroyed by EODU
655	UK-04-171	5258.2N,45.6E	52.97	0.76	Found on shore	09/03/05	Conventional	Destroyed	Partly corroded		phosphorus flare destroyed by EODU
656	UK-04-172	5743.5N,316.8W	57.73	-3.28	Entanglement in nets	10/03/05	Conventional	Disposed of on land	Seriously corroded		casing of Mk 17 ground mine recovered but was found to contain no explosive.
657	UK-04-173	5228.2N,145.2E	52.47	1.75	Found on shore	10/03/05	Conventional	Destroyed	Heavily corroded		WWII hand grenade and rifle shell destroyed by EODU
658	UK-04-174	5042.6N,134.1W	50.71	-1.57	Found on shore	12/03/05	Conventional	Disposed of on land	Seriously corroded		2 suspected shells 6" x 2" diameter removed by EODU
659	UK-04-175	5205.9N,135.3E	52.10	1.59	Found on shore	13/03/05	Conventional	Destroyed	Seriously corroded		WWI 110lb bomb detonated by EODU
660	UK-04-176	Marchwood, Southampton	50.82	-1.29	Dredging activities	15/03/05	Conventional	Disposed of on land	Seriously corroded		unexploded bomb picked up by dredger and removed by EODU
661	UK-04-177	57°18.9N,6°06.7W	57.32	-6.11	Found on shore	17/03/05	Conventional	Destroyed	Seriously corroded		hand grenade destroyed by EODU
662	UK-04-178	5559.1N,447.8W	55.99	-4.80	Found on shore	18/03/05	Conventional	Disposed of on land	Partly corroded		1 live smoke float recovered by CRT for disposal
663	UK-04-179	Earnsie Bay	54.08	-3.26	Found on shore	20/03/05	Conventional	Disposed of on land	Partly corroded		spent flare removed by CRT
664	UK-04-180	5049.2N,22.8E	50.82	0.38	Found on shore	20/03/05	Conventional	Disposed of on land	Completely corroded		harmless remnant of WWI munition removed by EOD
665	UK-04-181	5448.9N,326.2W	54.82	-3.44	Found on shore	20/03/05	Conventional	Destroyed	Seriously corroded		
666	UK-04-182	5129.9N,46.4E	51.50	0.77	Dredging activities	22/03/05	Conventional	Disposed of on land	Partly corroded		practice shell (harmless) recovered by EODU
667	UK-04-183	5041.8N,57.4W	50.70	-0.96	Dredging activities	23/03/05	Conventional	Destroyed	Partly corroded		live shell pulled up by dredger. Removed and detonated by EODU
668	UK-04-184	off Helford Passage	50.09	-5.14	Entanglement in nets	23/03/05	Conventional	Disposed of on land	Seriously corroded		item trawled by f/v was training shell considered safe for disposal on land and removed by EODU
669	UK-04-185	Peniver Beach, Kintyre Peninsula	55.46	-5.55	Found on shore	24/03/05	Conventional	Destroyed	Seriously corroded		old hand grenade, removed and destroyed by EODU
670	UK-04-186	5448.9N,457.1W	54.82	-4.95	Found on shore	24/03/05	Conventional	Destroyed	Seriously corroded		suspected mortar bomb destroyed by EODU
671	UK-04-187	5131.8N,48.2E	51.53	0.80	Found on shore	25/03/05	Conventional	Disposed of on land	Partly corroded		undischarged parachute flare recovered for eventual disposal.
672	UK-04-188	5018.6N,356.8W	50.31	-3.95	Found on shore	25/03/05	Conventional	Destroyed	Partly corroded		smoke flare destroyed by EODU
673	UK-04-189	5449.8N,454.7W	54.83	-4.91	Found on shore	25/03/05	Conventional	Destroyed	Seriously corroded		500lb bomb destroyed by EODU
674	UK-04-190	5406.8N,316.5W	54.11	-3.28	Found on shore	28/03/05	Conventional	Destroyed	Seriously corroded		remains of parachute flare, destroyed by EOD
675	UK-04-191	5444.5N,455.2W	54.74	-4.92	Found on shore	28/03/05	Conventional	Disposed of on land	Partly corroded		remains of training ordnance, not considered hazardous and therefore removed
676	UK-04-192	54 48.6N 003 27W	54.81	-3.45	Found on shore	28/03/05	Conventional	Destroyed	Partly corroded		destroyed by EODU
677	UK-04-193	Whitford Sands	51.65	-4.25	Found on shore	28/03/05	Conventional	Disposed of on land	Completely corroded		spent maroon casing recovered for disposal.

DATABASE ON MUNITIONS ENCOUNTERS

Ref	ID	Location	Lat	Long	Nature	Date	Type	Action	State	Release	Remarks
678	UK-04-194	5550.7N,507.9W	55.85	-5.13	Found on shore	29/03/05	Conventional	Destroyed	Partly corroded		2 anti-aircraft rounds recovered by EODU and detonated.
679	UK-04-195	55°37.8N,4°45.5W	55.63	-4.76	Found on shore	29/03/05	Conventional	Disposed of on land	Partly corroded		misfired hand flare recovered for disposal.
680	UK-04-196	5439.2N,110.6W	54.65	-1.18	Found on shore	30/03/05	Conventional	Destroyed	Heavily corroded		practice bomb destroyed by EODU
682	UK-04-198	5140.8N,457W	51.68	-4.95	Found on shore	02/04/05	Conventional	Disposed of on land	Heavily corroded		spent flare removed by CRT
683	UK-04-199	5124.6N,31.9E	51.41	0.53	Entanglement in nets	03/04/05	Conventional	Destroyed	Seriously corroded		1 box of ive 20mm rounds pulled up by f/v and detonated by EODU.
684	UK-04-200	5739.7N,337W	57.66	-3.62	Found on shore	05/04/05	Conventional	Disposed of on land	Partly corroded		suspected depth charge removed by EODU
685	UK-04-201	5453.4N,509.7W	54.89	-5.16	Found on shore	07/04/05	Conventional	Destroyed	Partly corroded		4 phosphorous flares destroyed by EODU
686	UK-04-202	4946N,733.4W			Found on shore	09/04/05	Conventional	Destroyed	Partly corroded		approx 35 artillery rounds destroyed by EODU
687	UK-04-203	Larbrax Bay	54.91	-5.17	Found on shore	10/04/05	Conventional	Disposed of on land	Partly corroded		2 phosphorous flares recovered by CRT for eventual disposal
688	UK-04-204	5054N,126.3W	50.90	-1.44	Dredging activities	10/04/05	Conventional	Destroyed	Partly corroded		suction dredger brought up 3" naval shell, which was detonated by EODU
689	UK-04-205	5448.9N,456.8W	54.82	-4.95	Found on shore	10/04/05	Conventional	Destroyed	Partly corroded		flare destroyed by EODU
690	UK-04-206	5130.3N,50.4E	51.51	0.84	Dredging activities	11/04/05	Conventional	Disposed of on land	Heavily corroded		shell dredged from seabed proved to contain no explosive, removed by EODU fro disposal.
691	UK-04-207	5506.7N 00639.9W	55.11	-6.67	Found on shore	14/04/05	Conventional	Disposed of on land	Partly corroded		unused but waterlogged flare removed for safe disposal
692	UK-04-208	52 23.37N 002 57.74E	52.39	2.96	Entanglement in nets	18/04/05	Conventional	Released at sea	Partly corroded	52 23.37N 002 57.74E	Dutch f/v released trawled ordnance at above position 4NM inside UK territorial waters. Dutch Navy alerted by Netherlands Coastguard for disposal.
693	UK-04-209	5025N,504.3W	50.42	-5.07	Found on shore	21/04/05	Conventional	Destroyed	Heavily corroded		unexploded bomb removed and detonated by EODU
694	UK-04-210	5202.4N,109.4E	52.04	1.16	Found on shore	22/04/05	Conventional	Disposed of on land	Heavily corroded		empty shell case removed by EODU
695	UK-04-211	5113.2N,1051.6W			Found on shore	24/04/05	Conventional	Disposed of on land	Unknown		rocket flare recovered by CRT
696	UK-04-212	5047.2N,16W	50.79	-0.27	Dredging activities	25/04/05	Conventional	Destroyed	Seriously corroded		12" live shell destroyed by EODU
697	UK-04-213	5309N,21.2E	53.15	0.35	Found on shore	26/04/05	Conventional	Destroyed	Partly corroded		army EOD team carried out a controlled detonation of a marine location marker, after it was located by a member of the public at North shore, Skegness
698	UK-04-214	49°46.0N,7°33.4W			Found on shore	30/04/05	Conventional	Destroyed	Partly corroded		2 live shells detonated by EODU
699	UK-04-215	5423.5N 00534.2W	54.39	-5.57	Found on shore	30/04/05	Conventional	Disposed of on land	Completely corroded		cordite washed ashore, collected by CRT for eventual removal by EODU
700	UK-04-216	50 39.09N 000 53.94N	50.65		Entanglement in nets	30/04/05	Conventional	Disposed of on land	Partly corroded		fishing vessel trawled up suspected ordnance which EODU found to be (harmless) solid shot
701	UK-04-217	5122.7N,111E	51.38	1.18	Found on shore	01/05/05	Conventional	Destroyed	Partly corroded		2 live 2" mortar rounds safely detonated by EODU
702	UK-04-218	5123.4N,56.4E	51.39	0.94	Found on shore	02/05/05	Conventional	Destroyed	Partly corroded		live 3" shell detonated safely by EODU
703	UK-04-219	5043.2N,147.3W)	50.72	-1.79	Found on shore	03/05/05	Conventional	Disposed of on land	Partly corroded		live parachute flare found on beach and recovered by CRT for later disposal
704	UK-04-220	51 36.750N 001 53.251E	51.61	1.89	Entanglement in nets	28/04/05	Conventional	Released at sea	Partly corroded	51 36.750N 001 53.251E	mine trawled by Dutch fishing vessel, placed on seabed for attention by Netherlands navy. Message forwarded by NL Coastguard.
705	UK-04-221	50 32.111N 002 20.092W	50.54	-2.33	Other	07/05/05	Conventional	Unknown	Partly corroded		unexploded bomb found on submerged wreck. Position recorded for eventual EODU recovery
706	UK-04-222	5421.9N,327.6W	54.37	-3.46	Found on shore	10/05/05	Conventional	Destroyed	Seriously corroded		artillery shell detonated by EODU
707	UK-04-223	5249.2N,132.7E	52.82	1.55	Found on shore	11/05/05	Conventional	Destroyed	Partly corroded		phosphorus marker flare safely detonated by EODU
708	UK-04-224	Bardsey Island	52.75	-4.79	Found on shore	11/05/05	Conventional	Disposed of on land	Partly corroded		spent flare recovered by CRT
709	UK-04-225	52°52.0N,1°27.6E	52.87	1.46	Found on shore	14/05/05	Conventional	Destroyed	Partly corroded		live phosphorus flare destroyed by EODU
710	UK-04-226	Covehithe beach, Suffolk	52.47	1.74	Found on shore	15/05/05	Conventional	Destroyed	Partly corroded		live phosphorus flare destroyed by EODU
711	UK-04-227	Portrush Harbour	55.20	-6.65	Found on shore	17/05/05	Conventional	Disposed of on land	Partly corroded		spent smoke marker removed by EODU
712	UK-04-228	51°22.7N,1°11.8E	51.38	1.20	Found on shore	17/05/05	Conventional	Destroyed	Partly corroded		2 live mortar shells destroyed by EODU
713	UK-04-229	Brancaster and Snettisham beaches	52.92	0.46	Found on shore	17/05/05	Conventional	Destroyed	Partly corroded		2 phosphorus flares, 1 live, 1 spent, destroyed by EODU
714	UK-04-230	5553N,616W	55.88	-6.27	Found on shore	19/05/05	Conventional	Destroyed	Heavily corroded		live WWII UXB destroyed by EODU
715	UK-04-231	5047.8N,3.1E	50.80	0.05	Found on shore	19/05/05	Conventional	Destroyed	Seriously corroded		live 14" shell removed and detonated by EODU
716	UK-04-232	5018.5N,357.1W	50.31	-3.95	Found on shore	21/05/05	Unknown	Destroyed	Partly corroded		unknown cylindrical object destroyed by EODU
717	UK-04-233	Downderry beach	50.09	-5.70	Found on shore	22/05/05	Conventional	Destroyed	Partly corroded		spent phosphorus flare destroyed by EODU
718	UK-04-234	5009.9N,505.3W	50.17	-5.09	Dredging activities	23/05/05	Conventional	Destroyed	Partly corroded		unspecified object believed ordnance found in dredger's grab, taken into deeper water and detonated by EODU
719	UK-04-235	5009.9N,505.3W	50.17	-5.09	Entanglement in nets	25/05/05	Conventional	Destroyed	Heavily corroded		fishing vessel trawled remnants of Mk17 mine. Item was returned to seabed and destroyed by EODU in controlled explosion
721	UK-04-237	5019.8N 00411.8W	50.33	-4.20	Found on shore	27/05/05	Conventional	Destroyed	Partly corroded		unspecified ordnance destroyed by EODU in controlled explosion
722	UK-04-238	Sandhead, Stranraer	54.80	-4.95	Found on shore	27/05/05	Conventional	Destroyed	Partly corroded		device identified by EODU as part of rocket and destroyed
723	UK-04-239	58 22.6N 000 01.1E	58.38	0.02	Other	28/05/05	Conventional	Released at sea	Partly corroded		fishing Vessel lost smoke float overboard, unable to retrieve due to unfavourable conditions
724	UK-04-240	5741N,244.2W	57.68	-2.74	Found on shore	30/05/05	Conventional	Disposed of on land	Partly corroded		rocket flare removed by CRT
725	UK-04-241	5131.2N,47.1E	51.52	0.79	Found on shore	02/06/05	Conventional	Destroyed	Partly corroded		2 live shells, 7" x 3" diameter, detonated safely by EODU

Ref	ID	Location	Lat	Long	Nature	Date	Type	Action	State	Release	Remarks
763	UK-04-279	56 08.15N 003 02.14W	56.14	-3.04	Entanglement in nets	18/07/05	Conventional	Destroyed	Heavily corroded		device was located in the Kilo 6 anchorage used by chemical tankers going into Braefoot Terminal. No known ammunition dumps in the area
764	UK-04-280	51 44.57N 000 59.94E	51.74	1.00	Entanglement in nets	19/07/05	Conventional	Destroyed	Heavily corroded		live 500lb WWII bomb removed from fishing vessel and safely detonated by EODU
765	UK-04-281	55 51.17 North 004 55.42 W	55.85	-4.92	Entanglement in nets	21/07/05	Conventional	Destroyed	Partly corroded		practice torpedo hauled up by fishing vessel and returned to seabed. destroyed by EODU
766	UK-04-282	5257.7N 000 36.5E	52.96	0.61	Other	23/07/05	Conventional	Unknown	Heavily corroded		reported to Yarmouth MRCC by Norfolk Police. Investigated by Hunstanton CG and identified at Low Water as solid shot, was covered by tide soon after.
767	UK-04-283	52058.1N 001 02.3E	52.97	1.04	Found on shore	26/07/05	Conventional	Destroyed	Partly corroded		reported to MRCC Yarmouth by Blakeney Warden. Confirmed as flares by Cley Coastguard. JSEOD advised and dispatched disposal team from Portsmouth. Norfolk Police advised prior to detonation.
768	UK-04-284	51-42.26N 0005-08.29W			Other	26/07/05	Conventional	Destroyed	Heavily corroded		Southern Division of EOD detonated WWII mine on site on 30/07/2005
769	UK-04-285	Whiteford Sands, Gower	51.65	-4.25	Found on shore	27/07/05	Conventional	Destroyed	Seriously corroded		live WWII shell detonated by EODU
770	UK-04-286	5903.1N,320.1W	59.05	-3.34	Found on shore	27/07/05	Conventional	Destroyed	Partly corroded		live flare found on beach and destroyed by EODU
771	UK-04-287	55-38.342N 004-49.855W	55.64	-4.83	Entanglement in nets	27/07/05	Conventional	Destroyed	Partly corroded		suspected ordnance destroyed 28th July by NDU (EOD), Faslane
772	UK-04-288	52 38.3N 001 44.4E	52.64	1.74	Found on shore	28/07/05	Conventional	Destroyed	Partly corroded		Army EOD from colchester attended and spent US Navy phosphorus flares destroyed by controlled explosion
773	UK-04-289	52.35.4N 001 44.4E	52.59	1.74	Found on shore	28/07/05	Conventional	Destroyed	Partly corroded		Army EOD from colchester attended and spent US Navy flares destroyed by controlled explosion
775	UK-04-291	50 37.85N 000 53.75W	50.63	-0.90	Dredging activities	01/08/05	Conventional	Destroyed	Partly corroded		found in usual dredging area south east of Nab Tower by dredger DONALD REDFORD. High explosive munition removed and destroyed by controlled explosion at DTG 010401UTC Aug 2005
776	UK-04-292	57 42N 002 06W	57.70	-2.10	Found on shore	03/08/05	Conventional	Disposed of on land	Partly corroded		found on popular tourist beach and in area close to RAF base. Tidal activity and usage of beach by public may have resulted in disturbance.
777	UK-04-293	53 49.8N 000 5.4W	53.83	-0.09	Found on shore	04/08/05	Conventional	Disposed of on land	Completely corroded		this location is a disused RAF bombing range and over the years sea erosion of the cliffs exposes spent cases. RAF EOD teams are constantly removing and clearing the area. On occasions members of the public walking the beaches report sightings of ordna
778	UK-04-294	52 37.170N 003 03.77E	52.62	3.06	Entanglement in nets	04/08/05	Conventional	Released at sea	Partly corroded	52 37.170N 003 03.77E	item was returned to the sea and buoyed off with a line to an old jerry can. Various authorities advised including CINCFLEET, Hydrographer, DEFRA, ROMCPS and various Coastguard stations and harbour authorities
779	UK-04-295	50 48.0N 000 32.8W	50.80	-0.55	Found on shore	04/08/05	Conventional	Destroyed	Partly corroded		origin unknown, presumed washed up on beach. destroyed by controlled explosion at 050845UTC Aug 2005
780	UK-04-296	Aldbrough beach			Found on shore	05/08/05	Conventional	Disposed of on land	Heavily corroded		used shells found by member of public. RAF EOD conduct regular sweep of area, former RAF range.
781	UK-04-297	52 27.116N 005 30.659W	52.45	-5.51	Entanglement in nets	05/08/05	Conventional	Disposed of on land	Heavily corroded		Following communications between the vessel and the EOD team from Faslane the vessel entered Campbeltown harbour. The rear section of the device has fallen from the net whilst being hauled in, but the remaining section was confirmed as being an empty mi
782	UK-04-298	5022.7N,509.3W	50.38	-5.16	Found on shore	05/08/05	Conventional	Destroyed	Partly corroded		EODU detonated smoke flare found on Perran beach, St Agnes
783	UK-04-299	57 40N 002 34W	57.67	-2.57	Found on shore	05/08/05	Conventional	Disposed of on land	Partly corroded		found near harbour, Whitehills. Tidal activity and usage of beach by public may have resulted in disturbance
784	UK-04-300	50 05.45N 004 18.38W	50.09	-4.31	Entanglement in nets	08/08/05	Unknown	Disposed of on land	Partly corroded		EODU advised that the fishing vessel had recovered a Sea Slug missile dummy head, totally inert and removed for disposal ashore. Report made from FV GUIDING LIFGHT NN722
785	UK-04-301	52 53.7N 001 24.2E	52.90	1.40	Found on shore	09/08/05	Conventional	Disposed of on land	Partly corroded		live flare disposed of on land by EODU
786	UK-04-302	52 34.11N 003 02.56E	52.57	3.04	Entanglement in nets	09/08/05	Conventional	Released at sea	Partly corroded	52 34.11N 003 02.56E	no description given other than the device corresponds with Deivice Number 25 on Netherlands Coastguard unexploded ordnance chart.

DATABASE ON MUNITIONS ENCOUNTERS

Ref	ID	Location	Lat	Long	Nature	Date	Type	Action	State	Release	Remarks
787	UK-04-303	53 05N 000 41E	53.08	0.68	Entanglement in nets	11/08/05	Conventional	Released at sea	Unknown	53 05N 000 41E	suspected unexploded bomb trawled up by fishing vessel, but device fell from gear back into the sea before it could be secured or marked.
788	UK-04-304	52 52.14N 002 42.13E	52.87	2.70	Entanglement in nets	11/08/05	Conventional	Released at sea	Partly corroded	52 52.14N 002 42.13E	no details of ordnance received, report received from Netherlands Coastguard.
789	UK-04-305	53 23.4N 000 14.2E	53.39	0.24	Found on shore	13/08/05	Unknown	Disposed of on land	Seriously corroded		assorted WWII munition dug up on beach by child. EOD requesting permission for full sweep of area in case of further ordnance.
790	UK-04-306	50 45.1N 000 09.3W	50.75	-0.16	Found on shore	15/08/05	Conventional	Destroyed	Partly corroded		Live WWII shell found on beach at Birling Gap, detonated by EODU
791	UK-04-307	56 00.2N 002 33.9W	56.00	-2.57	Found on shore	16/08/05	Conventional	Disposed of on land	Completely corroded		EODU investigated report of ordnance found on shore, device was tail section of 3" mortar, no explosive remaining inside.
792	UK-04-308	55 43.9N 004 56.9W	55.73	-4.95	Found on shore	18/08/05	Conventional	Destroyed	Partly corroded		live smoke canister detonated by EODU
793	UK-04-309	Skateraw, East Lothian	55.97	-2.42	Found on shore	19/08/05	Conventional	Disposed of on land	Partly corroded		two items of unspecified ordnance removed from shore by EODU
794	UK-04-310	50 38N 000 55W	50.63	-0.92	Dredging activities	20/08/05	Conventional	Disposed of on land	Partly corroded		4" shell dredged by vessel SCHELVE RING whilst carrying out dredging operations in the Nab dredging area. This is a renowned location for this type of incident.
795	UK-04-311	5450N,324.9W	54.83	-3.42	Found on shore	23/08/05	Conventional	Destroyed	Partly corroded		2 live shells detonated on Becksfoot beach by EODU
796	UK-04-312	56 02.407N 004 54 .025W	56.04	-4.90	Entanglement in nets	24/08/05	Conventional	Destroyed	Seriously corroded		fishing vessel trawled up section of old torpedo, returned to seabed and destroyed by EODU in controlled underwater explosion
797	UK-04-313	5258.7N,59E	52.98	0.98	Found on shore	25/08/05	Conventional	Destroyed	Partly corroded		phosphorus flare washed ashore at Blakeney Point, Norfolk. Device destroyed by EODU in controlled explosion.
798	UK-04-314	53 27.214N 002 25.232E	53.45	2.42	Entanglement in nets	26/08/05	Conventional	Released at sea	Partly corroded	53 27.214N 002 25.232E	Dutch fishing vessel trawled UXB, 4-5' long, 16" diameter. JSEOD and Hydrographer informed for further action.
799	UK-04-315	Shell Island	52.81	-4.15	Found on shore	26/08/05	Conventional	Disposed of on land	Partly corroded		suspected ordnance found on shore was rear portion of a rocket. No explosive material inside, removed by police.
800	UK-04-316	52 59.0N 000 43.0E	52.98	0.72	Found on shore	27/08/05	Conventional	Disposed of on land	Partly corroded		2 UXB found on Scott Head Island, former weapons and testing range. Removed by EODU
801	UK-04-317	54 48.6N 004 57.3W	54.81	-4.96	Found on shore	28/08/05	Conventional	Destroyed	Partly corroded		suspected WWII bomb destroyed in controlled explosion by RNEOD
802	UK-04-318	5533.6N,439.6W	55.56	-4.66	Found on shore	28/08/05	Conventional	Disposed of on land	Partly corroded		phosphorus flare washed ashore. Left to burn out and removed
803	UK-04-319	50 48.8N 000 20.0W	50.81	-0.33	Found on shore	30/08/05	Conventional	Disposed of on land	Partly corroded		shell removed from Lancing beach by EODU
804	UK-04-320	52 29.74N 002 52.36E	52.50	2.87	Entanglement in nets	01/09/05	Conventional	Released at sea	Partly corroded	52 29.74N 002 52.36E	release position is 41NM east of Lowestoft in 45M of water. The hydrographer has issued a navigation warning, WZ1294, concerning this ordnance.
805	UK-04-321	53 04.976N 002 16.16E	53.08	2.27	Entanglement in nets	07/09/05	Conventional	Released at sea	Partly corroded	53 04.976N 002 16.16E	report received from RCC Den Helder, no further information available. Release position id 2NM from Leman 49/27-BT platform and 1.8NM from a gas pipeline, laying in 22 metres of water. JSEOD and Hydrographer informed, WZ Notice 1315 issued.
806	UK-04-322	55 25.802N 005 26.194W	55.43	-5.44	Other	12/09/05	Conventional	Disposed of on land	Partly corroded		practice mine found floating by fishing vessel. Recovered by EODU.
807	UK-04-323	50 12N 005 25.8W	50.20	-5.43	Found on shore	16/09/05	Conventional	Disposed of on land	Partly corroded		para flare to be held in safe custody for disposal by EODU
808	UK-04-324	53 42.213n 000 37.95e	53.70	0.63	Other	20/09/05	Conventional	Destroyed	Partly corroded		unspecified ordnance located on seabed destroyed in controlled explosion
810	UK-04-326	3/4 NM North of Berry Head			Entanglement in nets	20/09/05	Conventional	Destroyed	Partly corroded		mine returned to seabed at 5734.1N,724.1W and detonated by EODU
812	UK-04-328	52 34.38N 002 59.68E	52.57	2.99	Entanglement in nets	22/09/05	Conventional	Released at sea	Partly corroded	52 34.38N 002 59.68E	report received from V/L Cornelis Jannetje C/s PHQL Reg No GO 23 via RCC Den Helder.
813	UK-04-329	Millport beach	55.75	-4.93	Found on shore	24/09/05	Conventional	Destroyed	Partly corroded		submarine marker smoke float found on beach, destroyed by EODU in controlled explosion
814	UK-04-330	Sandhead beach (Luce Sands)	54.80	-4.95	Found on shore	26/09/05	Conventional	Disposed of on land	Partly corroded		2" X 4" shell removed by EODU
815	UK-04-331	5420.2N,325.3W	54.34	-3.42	Found on shore	26/09/05	Conventional	Disposed of on land	Heavily corroded		corroded shell removed by EODU
816	UK-04-332	5126.7N,23.8E	51.45	0.40	Other	26/09/05	Conventional	Destroyed	Heavily corroded		WW II mine recovered by salvage vessel, detonated in controlled explosion by EODU
817	UK-04-333	5035.5N,112.2W	50.59	-1.20	Found on shore	27/09/05	Conventional	Destroyed	Heavily corroded		WW II anti-invasion mine washed ashore at Ventnor Haven, detonated by EODU
818	UK-04-334	55 50.9N,508.3W	55.85	-5.14	Found on shore	27/09/05	Conventional	Disposed of on land	Seriously corroded		device removed by EODU, believed to be expired smoke float.

2208	UK_0531	50.15.4N 003.51.4W	50.26	-3.85	Found on shore	10/01/07	Conventional	Disposed of on land	Partly corroded	N/A	Phosphorus smoke marker removed from scene for destruction.
2209	UK_0534	Starehole Bay near Bolt Head South Devon			Found on shore	19/01/07	Conventional	Destroyed	Partly corroded	N/A	Submarine marker flare probably washed ashore by recent storms destroyed by SDU 11.00 20/01/07 at low water.
2210	UK_0535	56.060N 006.107W	56.10	-6.17	Found on shore	22/01/07	Conventional	Destroyed	Seriously corroded	NA	RN EOD Team attended the scene and destroyed the device
2211	UK_0536	52.32.96N 003.03.06E	52.55	3.05	Entanglement in nets	24/01/07	Conventional	Released at sea	Unknown	52.32.96N 003.03.06E	Device marked by sonar reflector buoy
2212	UK_0537	54.45.9N 003.25.9W	54.77	-3.42	Found on shore	01/02/07	Conventional	Disposed of on land	Partly corroded	N/A	Item was a "Smokey Sam" Practice Missile
2213	UK_0539	52.39.395N 002.23.700E	52.66	2.38	Entanglement in nets	07/02/07	Conventional	Released at sea	Unknown	52.39.395N 002.23.700E	Fishing Activity
2214	UK_0538	52.25.05N 003.02.05E	52.42	3.03	Entanglement in nets	07/02/07	Conventional	Released at sea	Unknown	52.25.05N 003.02.05E	Marked with buoy and radar reflector
2215	UK_0540	52.29.4N 004.02.8W	52.49	-4.03	Found on shore	11/02/07	Conventional	Destroyed	Partly corroded	N/A	Destroyed by EODU at Ynyslas Beach (52.31.5W 004.02.9W)
2216	UK_0629	52 11.7560N 002 45.9870E	52.20	2.75	Entanglement in nets	16/02/07	Conventional	Released at sea	Unknown	52 11.7560N 002 45.9870E	Dropped by Dutch fishing vessel 'Op Hoop van Zegan' c/s PFVU marked by reflector
2217	UK_0541	56.46.6N 002.22.3W	56.78	-2.37	Found on shore	20/02/07	Unknown	Destroyed	Partly corroded	N/A	N/A
2218	UK_0542	56.38.8N 002.30.3W	56.65	-2.50	Found on shore	26/02/07	Conventional	Destroyed	Partly corroded	N/A	N/A
2219	UK_0543	52.33.50N 001 56.50E	52.56	1.93	Dredging activities	27/02/07	Conventional	Disposed of on land	Partly corroded	Euro Wharf, Rochester	Believed to be fired shell. 12 inches long by 5 to 6 inches in diameter with brass rifling at base. Removed by Colchester EOD at 281140UTC.
2220	UK_0544	55.13.8N 004.51.5w	55.23	-4.85	Found on shore	01/03/07	Conventional	Destroyed	Heavily corroded	N/A	Several phosphorous flares have been located which were already burning on the beach. A search of the vicinity located a further 17 flares. An EOD team from Faslane destroyed the flares.
2221	UK_0545	57.43.4N 003.20.03W	57.72	-3.33	Found on shore	02/03/07	Conventional	Disposed of on land	Heavily corroded	N/A	5 Separate pieces of ordnance and 1 tank mine located and disposed of on beach.
2222	UK_0546	52.51.6N 004.07.2W	52.86	-4.12	Found on shore	06/03/07	Conventional	Disposed of on land	Partly corroded		11 Pains Wessex Red Parachute flares collected on Harlech Beach by Harlech Coast Rescue Team, following a report received by North Wales Police.
2223	UK_0547	52.31.3N 004.03.3W	52.52	-4.05	Laying pipelines or cables	08/03/07	Conventional	Destroyed	Unknown	N/A	device identified as active rocket shell and EODU attended and carries out a controlled explosion on scene.
2224	UK_0548	51.20.9N 001.002E	51.35	1.00	Found on shore	25/03/07	Conventional	Disposed of on land	Partly corroded	NA	Ordnance examined and removed by Royal Navy southern diving Unit
2225	UK_0550	52.28.85N 002.52.47W	52.48	2.87	Entanglement in nets	01/04/07	Conventional	Released at sea	Unknown	52.28.85N 002.52.47E	Device reported to RCC Den Helder by Dutch fishing Vessel De Vertrouwen, C/SPBIN released into Approx 30M
2226	UK_0549	54.34.7N 000.42.1W	54.58	-0.70	Dredging activities	03/04/07	Conventional	Released at sea	Partly corroded	Released at sea	Intended release 54.58.2N 001.35.8W
2227	UK_0551	52.24.56N 003.02.34E	52.41	3.03	Entanglement in nets	04/04/07	Conventional	Released at sea	Unknown	52.24.56N 003.02.34E	Report received by Fax from RCC Den Helder
2228	UK_0557	54.51.4N 003.24.1W	54.86	-3.40	Found on shore	08/04/07	Conventional	Disposed of on land	Good condition	N/A	Device was a red flare used by vessels
2229	UK_0553	55.00.9N 3.20.6W	55.02	-3.34	Found on shore	08/04/07	Conventional	Disposed of on land	Unknown	NA	999 report of EOD at Bitterless, North Cumbria Location is just south of silloth. Objects investigated by Maryport Coast Rescue team and discovered to be an out of date red flare. Flare recovered by the CRT for disposal.
2230	UK_0552	52.19N 001.41E	52.32	1.68	Entanglement in nets	08/04/07	Conventional	Destroyed	Partly corroded	52.19N 001 41E	Device was identified by RNEOD as being a 200LB american Bomb from WWII and successfully detonated in situ at 1203UTC
2231	UK_0558	55.00.2N 1.25.0W	55.00	-1.42	Found on shore	09/04/07	Conventional	Disposed of on land	Partly corroded	N/A	The item was disposed of by the Navy EOD Team which attended from Faslane who confirmed it to be a World War II spigot mortar. Sunderland CGRT assisted in securing the area prior to detonation
2232	UK_0555	51.00N 001.03E	51.00	1.05	Entanglement in nets	09/04/07	Conventional	Destroyed	Partly corroded	NA	Divers blew the 500lb WWII bomb up underwater
2233	UK_0554	51.22.7N 001.11.0E	51.38	1.18	Found on shore	09/04/07	Conventional	Destroyed	Partly corroded	N/A	N/A
2234	UK_0556	51.20.7N 000.57	51.35	0.95	Found on shore	11/04/07	Conventional	Destroyed	Partly corroded	N/A	Device was detonated by EODU in location found
2235	UK_0559	54.34.2N 003.34.7W	54.57	-3.58	Found on shore	12/04/07	Conventional	Disposed of on land	Seriously corroded	NA	EOD unit stated device still contained some of its contents and removed device for safe disposal.
2236	UK_0560	50.44.9N 000.14.4E	50.75	0.23	Found on shore	16/04/07	Conventional	Disposed of on land	Partly corroded	NA	The location being next to the cliff could have resulted in rock fall
2237	UK_0561	52.29.4N002.58.9E	52.49	2.98	Entanglement in nets	17/04/07	Conventional	Released at sea	Unknown	52.29.4N 002.58.9E	Type 29 or 30
2238	UK_0562	552.25.97N 002.53.84E	55.04	2.90	Other	18/04/07	Conventional	Released at sea	Unknown	52.25.97N 002.53.84E	Explosive type 29 from Dutch Explosive list
2240	UK_0565	55.26N.005.07W	55.43	-5.12	Other	26/04/07	Unknown	Disposed of on land	Partly corroded	N/A	Awaiting identification by the EOD
2241	UK_0564	52.53.12N 002.43.22E	52.89	2.72	Entanglement in nets	26/04/07	Conventional	Unknown	Unknown	52.23.12N 002.43.22E	
2242	UK_0566	55.26N 004.40W	55.43	-4.67	Found on shore	29/04/07	Unknown	Destroyed	Partly corroded	NA	The object was a submarine smoke marker which EOD Disposed of
2243	UK_0567	52.22.6N 002.50.9E	52.38	2.85	Entanglement in nets	03/05/07	Conventional	Released at sea	Unknown	52.22.6N.002.50.9E	Fax report received from RCC Den Helder
2244	UK_0570	57.59.8N 352.8W	58.00	-3.88	Found on shore	05/05/07	Conventional	Destroyed	Completely corroded	N/A	Phosphorous Marine Marker - 12M east of firing practice area (D807)

DATABASE ON MUNITIONS ENCOUNTERS

Ref	ID	Location	Lat	Long	Nature	Date	Type	Action	State	Release	Remarks
2245	UK_0569	50.40.30N 001.57.80W	50.67	-1.96	Found on shore	05/05/07	Conventional	Destroyed	Partly corroded	Cleared from Sandbanks, Poole H	Found by member of the public while wading. Destroyed by EODU from Tidworth Barracks
2246	UK_0568	51.20.7N 00057.7E	51.35	0.96	Found on shore	05/05/07	Conventional	Disposed of on land	Completely corroded	N/A	Item was identified as a mortar shell and removed by the Army.
2249	UK_0573	55.58.2N 00257.2W	55.97	-2.95	Other	09/05/07	Conventional	Disposed of on land	Seriously corroded	N/A	Device was deemed to be motor section of torpedo disposed locally.
2251	UK_0575	55.30N 00520W	55.50	-5.33	Found on shore	15/05/07	Conventional	Disposed of on land	Partly corroded	N/A	N/A
2252	UK_0576	56.04.66N 004.81.83W	56.08	-5.35	Other	17/05/07	Conventional	Destroyed	Seriously corroded	56.02.8N 004.49.1W	Reported to MRCC Clyde by duty Harbour Controller RN base Faslane that EOD would be carrying out a controlled explosion on the WWII bomb
2254	UK_0578	52.58.4N 000.31.3E	52.97	0.52	Found on shore	20/05/07	Conventional	Disposed of on land	Partly corroded	NA	Approximatly 9 live rounds corroded together found on the beach below the high water mark
2255	UK_0579	55.39.2N 004.51.4W	55.65	-4.85	Dredging activities	23/05/07	Conventional	Disposed of on land	Partly corroded	North Beach Ardrossan	six detonaters trawled up by fishing vessel Valhalla and landed ashore to EOD team from Faslane who assisted by galloway SM conducted a cotrolled explosion.
2256	UK_0580	51.45.5N 004.25.1W	51.76	-4.42	Found on shore	25/05/07	Unknown	Disposed of on land	Heavily corroded	na	Object identified as a smoke float.
2257	UK_0581	52.58.6N 000.48.1E	52.98	0.80	Found on shore	02/06/07	Conventional	Destroyed	Partly corroded	N/A	Device was washed ashore, Mk 25 Phosphorous Marine Marker Flare
2258	UK_0582	54.39.6N 005.28.9W	54.66	-5.47	Found on shore	08/06/07	Chemical	Disposed of on land	Seriously corroded		Removed from beach by Bangor Coastguard Rescue Team in secure container and covered in water. Search of the beach completed to ensure no further devices washed ashore (Phosphorous Flare).
2259	UK_0583	54.54.2N 003.33.1W	54.90	-3.55	Found on shore	11/06/07	Conventional	Destroyed	Partly corroded	N/A	Ordnance destroyed in situ by EOD Team.
2260	UK_0584	54.02.8N 002.54.5W	54.05	-2.90	Found on shore	13/06/07	Conventional	Destroyed	Partly corroded		Two live 3" mortars plus a small number of expired mortars were found and destroyed. On the shore at Half Moon Bay, Heysham, Lancashire.
2261	UK_0585	50.10.3N 005.39.4W	50.17	-5.65	Found on shore	15/06/07	Unknown	Disposed of on land	Partly corroded		Item photographed and sent to EODU, thought not to be hazardous. EODU to collect on next routine collection.
2262	UK_0586	57.52.7N 006.56.1W	57.88	-6.93	Found on shore	23/06/07	Conventional	Unknown	Partly corroded	NA	N/A
2263	UK_0587	51.23.00N 000.45.6E	51.38	0.75	Dredging activities	25/06/07	Conventional	Destroyed	Partly corroded	NA	Device was dredged up from the seabed during routine dredging ops and found when cargo was being discharged when vessel was alongside.
2264	UK_0588	50.82.83N 000.41.33E	51.38	0.68	Found on shore	02/07/07	Conventional	Destroyed	Partly corroded	NA	Object located on beach at hebrand walk Bexhill on sea East sussex UK Object identified as a three inch shell with no markings
2265	UK_0589	52.54.515N 002.49.362E	52.91	2.82	Entanglement in nets	04/07/07	Conventional	Released at sea	Partly corroded	52.54.515N 002.49.362E	NA
2266	UK_0590	50.20.7N 004.15.3W	50.35	-4.25	Found on shore	08/07/07	Conventional	Disposed of on land	Unknown	NA	Unused smoke marker located by RNLI Lifeguards at freathy
2267	UK_0591	50.47.00N 000.59.W	50.78	-0.98	Found on shore	10/07/07	Conventional	Disposed of on land	Partly corroded	NA	3 x 303 rounds- recovered by Hayling Coastguard to be collected from Hayling Lookout by SDU2
2268	UK_0592	55.34N 004.40W	55.57	-4.67	Entanglement in nets	12/07/07	Conventional	Destroyed	Seriously corroded	NA	Report from vessel Fair Morn
2270	UK_0594	53.06.02N 0041.59.70E	53.10	4.03	Entanglement in nets	19/07/07	Conventional	Released at sea	Unknown	53.06.02N 001.59.70E	Dropped near a pipeline in a gas field suspected minimum 500 LB aircraf bomb.
2272	UK_0595	57.66.33N 002.51.00W	58.11	-2.85	Found on shore	23/07/07	Unknown	Destroyed	Partly corroded	NA	An unidentified metal cannister was washed ashore at the waterline. As a precaution the canister was destroyed in a controlled explosion
2273	UK_0598	54.52.9N 33.5.2.W	54.88	-3.58	Found on shore	29/07/07	Conventional	Destroyed	Partly corroded	NA	2 devices found. 2nd device located 4 miles from the 1st near Mersehead Plantation,area less populated 1st device taken to the location of 2nd device and both destroyed. No indication as to where they had come from
2274	UK_0597	51.29.7N 000.46.5E	51.50	0.77	Dredging activities	29/07/07	Unknown	Disposed of on land	Partly corroded	NA	3 Inch Practice Shell
2275	UK_0599	54.50.30N 003.26.10W	54.84	-3.43	Other	01/08/07	Conventional	Disposed of on land	Completely corroded	N/A	Ordnance sighted by another vessel at sea close inshore. Items washed ashore at low water investigated by Northern Diving Group Personnel. Identified as spent ordnance and removed for disposal
2276	UK_0600	54.53.4N 005.09.6W	54.89	-6.15	Found on shore	10/08/07	Conventional	Destroyed	Partly corroded	N/A	Possibly being washed up from a known WWII disposal site close by.
2277	UK_0601	51.31.9n 000.40.6E	51.53	0.67	Found on shore	11/08/07	Conventional	Destroyed	Partly corroded	NA	NA
2278	UK_0602	52.47.36N 002.23.36E	52.79	2.38	Entanglement in nets	14/08/07	Conventional	Released at sea	Unknown	52.47.36N 002.23.360E	Marked by Sonar Reflector Buoy. This position is 26NM off winteron and 800M of UK Netherland 14 cable (Cable and Wireless) phone 004751934519 also 400M East of Norsa Commms cable phone 01344 602218
2279	UK_0603	54.53.0N 005.05.0W	54.88	-5.08	Found on shore	16/08/07	Conventional	Destroyed	Partly corroded	N/A	
2280	UK_0604	55.6N 005.7W	55.60	-5.70	Found on shore	21/08/07	Conventional	Unknown	Partly corroded	N/A	Item identified as a marine flare
